Field note answers:

1. Rocky road- chondrites ~stony (stony-iron)
2. Chocolate- iron with out fusion crust
3. 3 Muskateers- achrondite with fuction crust
4. Brownie- carbonaceous chondrites Stony

Stony

Meteorites

Stony

Light, silicate materials

Chondrites:

Round balls of silicate material called chondrules

Carbonacous chrondrites:

Tell of early solar system, darker

~~Achrondrites:~~

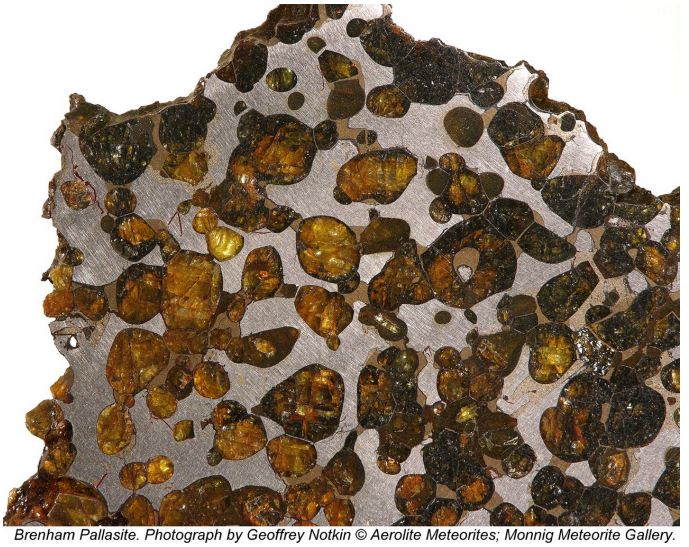
Every other kind

Iron

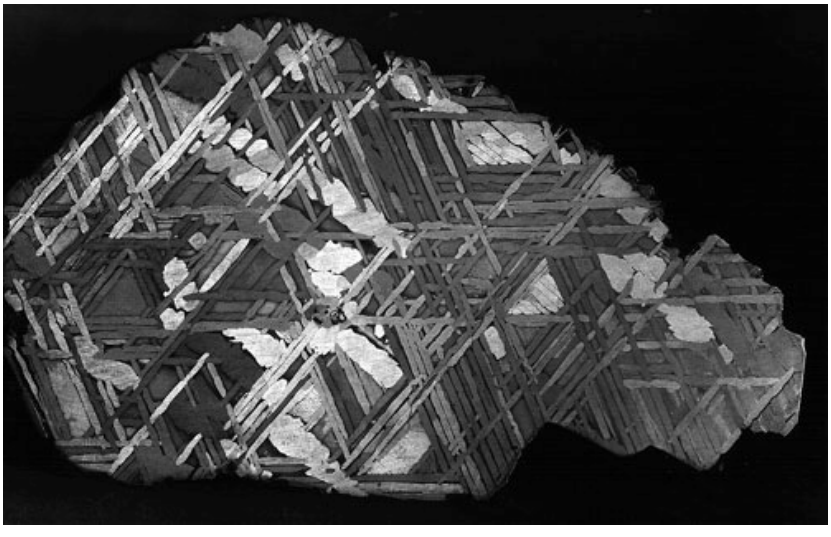
Rare, iron-make up

Stony-Iron

Rarest- iron and stony components to the meteorite



Brenham Pallasite. Photograph by Geoffrey Notkin © Aerolite Meteorites; Monnig Meteorite Gallery.

Widmänstatten Pattern


Etched with acid, impossible to fake
